

REGULATEURS EUROPA 2800 Series Hydraulic Actuator

REGULATEURS EUROPA has introduced the 2800 Hydraulic Actuator in September 2010. The 2800 Actuator has a work output of 30 ft lbf (40.5 Nm) and will also be available with a ballhead back-up.

- ➔ The non-ballhead version is particularly suited to diesel engines in industrial and power generating applications.
- ➔ The ballhead back-up model is intended for critical applications such as marine propulsion.
- ➔ A high work output actuator in a compact body size
- ➔ Designed to work with REGULATEURS EUROPA Viking electronic governor or other proprietary electronic governor controls
- ➔ True proportional actuator. No position feedback required
- ➔ Interchangeability with UG range of governors and actuators

Regulateurs Europa Ltd. (www.regulateurseuropa.com)

REGULATEURS EUROPA has been providing diesel engine governors since the 1950s. It now offers integrated solutions for control and monitoring of plant and equipment in the industrial, marine, traction and power generation industries.

Since 2005 REGULATEURS EUROPA has been part of the HEINZMANN group, provider of electronic fuel injection controls, complete common rail components as well as mechanical, analogue and digital electronic engine control systems.

The REGULATEURS EUROPA control and monitoring systems capability, together with its range of hydraulic governors and actuators, fits well with HEINZMANN's comprehensive product range; thus establishing a full-line provider of controls for all major types of prime mover and associated plant.
